

Test Day – Do you do these things?

YES NO

Do a “mind dump”

As soon as I get my test, I write anything I want to remember at the top (names, dates, memory cues, etc.).

Make a plan

Before I start, I quickly look over the test and decide how much time to spend on each section.

Don’t get stuck on difficult questions

I put a dot next to any answer I’m not sure of. After I’ve gone through the test, I go over these again.

Check all answers

I check my answers—I may have made a careless mistake.

Have any NOs? If so, try doing them the next time you have a test.
